

## Presentation

EWJI organises various online formative actions aimed at professionals from the industry.

EWJI webinars are video presentations available online anywhere, anytime and from any device, about different topics related to water jetting.

The webinar “The need for training and education on the water jetting industry” was held by EWJI. It was imparted by Mr. Jan van der Wal from STONEAGE.

More information about this webinar in [www.ewji.org/webinars](http://www.ewji.org/webinars)

## Topics

## EWJI

The mission of the European Water Jetting Institute, EWJI, is to promote the water jetting industry and its applications in Europe, towards the highest standards of safety, professional integrity and quality of service.

To achieve this mission, EWJI works to create and uphold a global network of professionals and information, including companies (contractors, manufacturers and asset owners) and associations, stakeholders and legislators, managers and workers, ... all of them working together to develop and share best practices, regulations and training.
